

Professional Machinery, Power Transmission, Motion Control & Automation Components Manufacturer in Taiwan

- **Precision Servo Planetary Gearboxes (Gearheads):** various mounting configuration including inline, right-angle, flange, flange & right angle, hollow shaft, stainless steel, NEMA23/NEMA24, NEMA34, NEMA56; spur gears & helical gears; various frame sizes, wide torque ranges, diverse ratios & custom available (e.g., specific shaft type, shaft dia., or shaft length, keyway)
- **Other & Custom Gearboxes:** spiral bevel gearboxes, gearboxes for AGV, gearboxes for robotics, etc.
- **Industrial Reducers:** for machine applications requiring for heavy torques.
- **Planetary Gear Motors:** AC or BLDC planetary gear motors (assembled).
- **Gear Motors:** AC gear motors, various power ranges (e.g., 10W~2KW).
- **Stepper Motors & Drive:** various stepping angles, wide torque ranges & mounting ways
- **Brushless DC Motors & Drive:** wide power ranges or voltage choices; AGV BLDC motor, NEMA BLDC, etc.
- **Linear Actuators:** compact, economical or heavy loading models.
- **Other Components:** bearings, couplings, indexers & hollow rotatory reducer, etc.

INDUSTRIES: machinery, automation, motion control, power transmission, machine tool, medical, defense, and so forth.

APPLICATIONS: machine tool, packaging machines, food machines, plasma cutting machines, water-jet, bending machines, textile machines, printing machines, drilling machines, lathes and turning machines, milling machines, grinding machines, metal-forming machines, beverage processing machines, agricultural machines, shoemaking machines, wooden machining, laser cutting machines, inspection machines, welding machines, SPM, semi-conductor equipment, automation equipment, and so on.

For detailed specifications & dimensions, please contact PCCM TECH.
